

CONCEPTUAL DESIGN INSTALLATION OF RAINWATER HARVESTING SYSTEMS

- Tanksite considerations:**
1. Distance from house to allow future extension
 2. base elevation c.f house and roof
 3. Location to maintain access
 4. Space and distance from house for future installation of pressure pump and avoid noise pollution
 5. Proximity to existing plumbing and gutters.
 6. Do site levels allow gravity feed to premises or adjoining buildings?
 7. If 2-storey house then elevate tank

PLAN VIEW - NOT TO SCALE
