

Global Climate Change Alliance Plus (GCCA+) Scaling Up Pacific Adaptation Project (SUPA)

Project Concept Note

Name of Country	
Name of Lead Agency/Ministry	
General Information	
Project Title	
Project Site(s)	
Project Duration	
Project Partners	
Indicative Project Cost	
<i>Funding modality: Indicate below your country's preference for funding arrangements for national coordinator and implementation.</i>	
Do you need a national coordinator (Yes or No)?	
If you answered "No" above, proceed to question 3.	
1. Place a tick in the box on the right to indicate the modality for funding the national coordinator position.	
Country recruits and pays the national coordinator through a Grant Agreement with SPC	<input type="checkbox"/>
SPC recruits the national coordinator so he/she becomes an SPC staff based in-country	<input type="checkbox"/>
2. In which agency will the national coordinator be housed?	
3. Place a tick in the box on the right to indicate the modality for funding implementation of activities.	
Country carries out procurement for all activities through a Grant Agreement with SPC (and according to SPC's procurement policies and procedures)	<input type="checkbox"/>
SPC carries out procurement for all activities	<input type="checkbox"/>
Blend of the above two modalities	<input type="checkbox"/>

Proposed Project Outputs	

General Criteria for Identification of Projects

Criteria	How does the proposed project adhere to the criterion?
<p>1. Each country is to select one sector from the following list for scaling up: <i>i) Food security, ii) Water security, iii) Human health, iv) Coastal protection, v) Marine resources</i>); and the sector selected must be linked to national priorities.</p>	<p>Sector selected:</p> <p>How is this sector selection linked to national priorities:</p>
<p>2. Identify the tested and effective previous measure that has elements of sustainability, and is to be scaled up in the project timeframe.</p>	
<p>3. The selected scaled up measures must have socio-economic benefits for the communities and be implemented using an evidence-based gender-sensitive and rights-based approach.</p>	
<p>4. The selected scaled up measure must fit within the scope of the SUPA budget.</p>	
<p>5. Recognising that maintenance of government-owned infrastructure is the responsibility of the particular government agency, provisions for maintaining the newly scaled up measure must be included in the SUPA intervention as this is essential for sustainability.</p>
